# OUR WORK

# WE GO GREEN

Construction trades are known to be waste intensive. Building operations specifically are notorious for consuming natural resources. But it doesn't have to be that way. Instead, **we can simply transform the way we do business.**

Green technologies have become more efficient over the years and have **proven to improve cost savings over time.**

Implementing sustainability programs means **we can think ahead and leave something of value for future generations,** instead of another liability.

To maintain our leadership role, we have our very own Pacific Retail Construction, Inc. **LEED Accredited professionals, President, George Nimeh and our Northern Region Director, Bill Nimeh, on the job.** Further, we implement an in house training program to ensure all project management and **field staff are qualified** to oversee these technologies.

If LEED certification is not your goal, we will help identify **cost saving mechanisms based on our knowledge of green technologies.** If you're a green-conscious retailer, architect, engineer, property manager or owner, we speak your language and share your vision of the future.

# YOUR VISION CAN BE REALITY

We strive to offer original designs and provide **quality workmanship and top-of-the-line materials.** We do it all while keeping **your budget and vision in mind** and work fervently to achieve the highest standards of quality and safety. We take an active approach and provide practical, usable designs that you will love. **We can build any style of the house depending on your taste and lifestyle.**

**RANCH STYLE • ITALIAN VILLA • SOUTHWESTERN • CONTEMPORARY & MODERN • MEDITERRANEAN**
